AUTHOR INDEX

	Page		Page
Agnew, J. B., Lee, P. L., and Newell, R. B., A comparative study of control techniques applied to an unstable steady state of a chemical reactor	105	Larkai, S. K. L., and Bailes, P. J., An experimental investigation into the use of high voltage D.C. fields for liquid phase separation	229
Ahmed, I., and Sunderland, P., Mass transfer in a vibration mixed reactor	95	Lee, P., Newell, R. B., and Agnew, J. B., A comparative study of control techniques applied to an unstable steady state of a chemical reactor	105
Andow, P. K., Fault trees and failure analysis; discrete state representation problems	125	Lehrer, I. H., A new model for free turbulent jets of miscible fluids of different density and a jet mixing time criterion	247
Bailes, P. J., and Larkai, S. K. L., An experimental investigation into the use of high voltage D.C. fields for liquid phase separation	229	Lewis, D. A., and Kenney, C. N., Niobium disulphide as an isomerisation and hydrogenation catalyst in the presence of hydrogen sulphide	186
Bhave, R. R., and Sharma, M. M., Liquid-liquid reactors; operation under refluxing conditions; measurement of effective interfacial area	161	Liapis, A. I., and Litchfield, R. J., A note on the off-diagonal terms of the effective pore diffusivity matrix	122
Brown, D. J., and Priestman, G. H., The mechanism of pressure pulsations in sieve tray columns	279	Liapis, A. I., and McAvoy, T. J., Transient solutions for a class of hyperbolic counter-current distributed heat and mass transfer systems	89
Carberry, J. J., Some aspects of catalytic reactor engineering	75	Litchfield, R. J., and Liapis, A. I., A note on the off-diagonal terms of the effective pore diffusivity matrix	122
Chapman, C. M., Nienow, A. W., and Middleton, J. C., Particle suspension in gas sparged Rushton turbine agitated vessel	134	Lockett, M. J., The froth to spray transition on sieve trays	26
Coppus, J. H. C., and Rietema, K., Mass transfer from spherical cap bubbles—the contribution of the bubble rear	54	McAvoy, T. J., and Liapis, A. I., Transient solutions for a class of hyperbolic counter-current distributed heat and mass transfer systems	89
Crook, E. M., Comments on the relevance of bacterial motility to fermenter contaminations; an experimental study for bacillus cereus (Slater, Powell, and Johnson)	286	Mann, R., Mavros, P. P., and Middleton, J. C., A structured stochastic flow model for interpreting flow-follower data from a stirred vessel	271
Davidson, J. F., Ross, I. B., and Patel, M. S., The temperature of burning carbon particles in fluidised beds	83	Martin, B., Kolar, Z., and Wesselingh, J. A., The falling velocity of a sphere in a swarm of different spheres	100
Del Giudice, S., and Trotta, A., Behaviour of tubular reactors of arbitrary cross-section	207	Masson, H., and Rowe, P. N., Interaction of bubbles with probes in gas fluidised beds	177
Goodman, M. G., and Morton, W., Parametric oscillations in simple catalytic reaction models	253	Mavros, P. P., Middleton, J. C., and Mann, R., A structured stochastic flow model for interpreting flow-follower data from a stirred vessel	271
Grootsoolten, P. A. M., and Scrutton, A., A study on the dissolution and growth of sodium chloride crystals	238	Middleton, J. C., Mann, R., and Mavros, P. P., A structured stochastic flow model for interpreting flow-follower data from a stirred vessel	271
Hiemstra, W., van de Sande, E., and Sloof, R., Turbulent velocity profiles in a straight circular pipe at high temperatures	283	Middleton, J. C., Nienow, A. W., and Chapman, C. M., Particle suspension in a gas sparged Rushton turbine agitated vessel	134
Hughes, R., and Kam, E. K. T., A model for the direct reduction of iron ore by mixtures of hydrogen and carbon monoxide in a moving bed	196	Moles, F. D., and Jenkins, B. G., Modelling of heat transfer from a large enclosed flame in a rotary kiln	17
Hunek, J., and Swainky, J., Methods for investigating backmixing in the continuous phase of multiplex extraction columns	64	Morton, W., and Goodman, M. G., Parametric oscillations in simple catalytic reaction models	253
Jackson, R., and Judd, M. R., Further consideration of the effect of aeration on the flowability of powders	119	Mulcachy, L. T., LaMotta, E. J., and Shieh, W. K., Fluidised bed biofilm reactor effectiveness factor expressions	129
Jenkins, B. G., and Moles, F. D., Modelling of heat transfer from a large enclosed flame in a rotary kiln	17	Newell, R. B., Agnew, J. B., and Lee, P. L., A comparative study of control techniques applied to an unstable steady state of a chemical reactor	105
Johnson, P., Slater, N. K. H., and Powell, M. S., The relevance of bacterial motility to fermenter contaminations and experimental study for bacillus cereus	170	Nienow, A. W., Middleton, J. C., and Chapman, C. M., Particle suspension in gas sparged Rushton turbine agitated vessel	134
Judd, M. R., and Jackson, R., Further consideration of the effect of aeration on the flowability of powders	119	Patel, M. S., Davidson, J. F., and Ross, I. B., The temperature of burning carbon particles in fluidised beds	83
Kam, E. K. T., and Hughes, R., A model for the direct reduction of iron ore by mixtures of hydrogen and carbon monoxide in a moving bed	196	Powell, M. S., Johnson, P., and Slater, N. K. H., The relevance of bacterial motility to fermenter contaminations and experimental study for bacillus cereus	170
Kenney, C. N., and Lewis, D. A., Niobium disulphide as an isomerisation and hydrogenation catalyst in the presence of hydrogen sulphide	186	Prausnitz, J. M., Calculations of phase equilibria for separation operations	3
Kolar, Z., Wesselingh, J. A., and Martin, B., The falling velocity of a sphere in a swarm of different spheres	100	Priestman, G. H., and Brown, D. J., The mechanism of pressure pulsations in sieve tray columns	279
Krishna, R., Ternary mass transfer in a wetted-wall column—significance of diffusional interactions. Part 1 Stefan diffusion	35	Rietema, K., and Coppus, J. H. C., Mass transfer from spherical cap bubbles—the contribution of the bubble rear	54
Krishna, R., Ternary mass transfer in a wetted-wall column—significance of diffusional interactions. Part 2 Equimolar diffusion	44	Ross, I. B., and Patel, M. S., and Davidson, J. F., The temperature of burning carbon particles in fluidised beds	83
Kyte, W. S., Some chemical and chemical engineering aspects of flue gas desulphurisation	219	Rowe, P. N., and Masson, H., Interaction of bubbles with probes in gas fluidised beds	177
LaMotta, E. J., Shieh, W. K., and Mulcachy, L. T., Fluidised bed biofilm reactor effectiveness factor expressions	129	Sawinsky, J., and Hunek, J., Methods for investigating backmixing in the continuous phase of multiplex extraction columns	64
		Scrutton, A., and Grootsoolten, P. A. M., A study on the dissolution and growth of sodium chloride crystals	238

			Chairman and
			Honorary Editor

TITLE INDEX

	Page		Page
Behaviour of tubular reactors of arbitrary cross-section by S. Del Giudice and A. Trotta	207	Modelling of heat transfer from a large enclosed flame in a rotary kiln by B. G. Jenkins and F. D. Moles	17
Calculation of phase equilibria for separation operations by J. M. Prausnitz	3	New model for free turbulent jets of miscible fluids of different density and a jet mixing time criterion by I. H. Lehrer	247
Comments on the relevance of bacterial motility to fermenter contaminations; an experimental study for bacillus cereus (Slater, Powell and Johnson) by E. M. Cook	286	Niobium disulphide as an isomerisation and hydrogenation catalyst in the presence of hydrogen sulphide by C. N. Kenny and D. A. Lewis	186
Comparative study of control techniques applied to an unstable steady state of a chemical reactor by J. B. Agnew, P. L. Lee and R. B. Newell	105	Note on the off-diagonal terms of the effective pore diffusivity matrix by R. J. Litchfield and A. I. Liapis	122
Experimental investigation into the use of high voltage D.C. fields for liquid phase separation by P. J. Bailes, and S. K. L. Larkai	229	Parametric oscillations in simple catalytic reaction models by M. G. Goodman and W. Morton	253
Falling velocity of a sphere in a swarm of different spheres by Z. Kolar, J. A. Wesselingh and B. Martin	100	Particle suspension in gas sparged Rushton turbine agitated vessel by C. M. Chapman, A. W. Nienow and J. C. Middleton	134
Fault trees and failure analysis; discrete state representation problems by P. K. Andow	125	Relevance of bacterial motility to fermenter contaminations and experimental study for bacillus cereus by P. Johnson, N. K. H. Slater and M. S. Powell	170
Fluidised bed biofilm reactor effectiveness factor expressions by L. T. Mulcahy, E. J. LaMotta and W. K. Shieh	129	Some aspects of catalytic reactor engineering by J. J. Carberry	75
Formation and properties of apparently incompressible filter cakes under vacuum on downward facing surfaces by R. J. Wakeman	260	Some chemical and chemical engineering aspects of flue gas desulphurisation by W. S. Kyte	219
Froth to spray transition on sieve trays by M. J. Lockett	26	Structured stochastic flow model for interpreting flow-follower data from a stirred vessel by R. Mann, P. P. Mavros, and J. C. Middleton	271
Further consideration of the effects of aeration on the flowability of powders by R. Jackson and M. R. Judd	119	Study on the dissolution and growth of sodium chloride crystals by P. A. M. Grotscholten and A. Scrutton	238
Interaction of bubbles with probes in gas fluidised beds by H. Masson and P. N. Rowe	177	Temperature dependence of liquid phase mutual diffusion coefficients by M. T. Tyn	112
Liquid-liquid reactors; operation under refluxing conditions; measurement of effective interfacial area by R. R. Bhavé and M. M. Sharma	161	Temperature of burning carbon particles in fluidised beds by J. F. Davidson, I. B. Ross and M. S. Patel	83
Mass transfer from spherical cap bubbles—the contribution of the bubble rear by J. H. C. Coppus and K. Rietema	54	Tenary mass transfer in a wetted-wall column significance of diffusional interactions Part 1 Stefan diffusion by R. Krishna	35
Mass transfer in a vibration mixed reactor by I. Ahmed and P. Sunderland	95	Tenary mass transfer in a wetted-wall column significance of diffusional interactions Part 2 Equimolar diffusions by R. Krishna	44
Mechanism of pressure pulsations in sieve tray columns by D. J. Brown, and G. H. Priestman	279	Thickening and filtration; a review and evaluation of recent research	147
Methods for investigating backmixing in the continuous phase of multiplemixer extraction columns by J. Hunek and J. Sawinsky	64	Transient solutions for a class of hyperbolic counter-current distributed heat and mass transfer systems by Z. I. Liapis and T. J. McAvoy	89
Model for the direct reduction of iron ore by mixtures of hydrogen and carbon monoxide in a moving bed by R. Hughes and E. K. T. Kam	196	Turbulent velocity profiles in a straight circular pipe at high temperatures by W. Hiemstra, E. van de Sande and R. Sloof	283
